

## Schedule Planner Guide for Selecting Special Classes

Some classes at UT Dallas are targeted to specific student groups or are corequisite classes. Corequisite courses mean that you must be enrolled in both classes at the same time. For some of these corequisite courses, specific sections of one course will require you to register for specific sections of the other course.

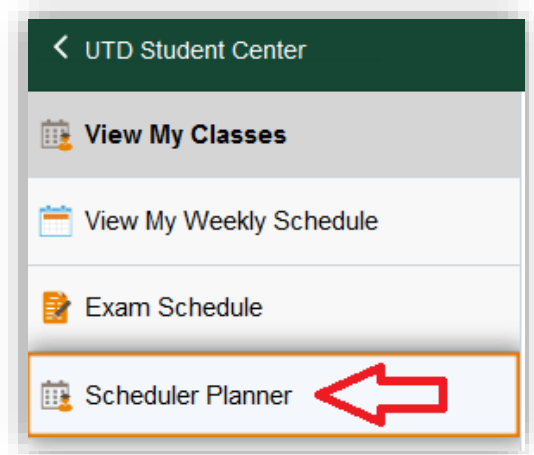

Go to <https://www.utdallas.edu/galaxy/>, click on Orion and login with your netid and password.

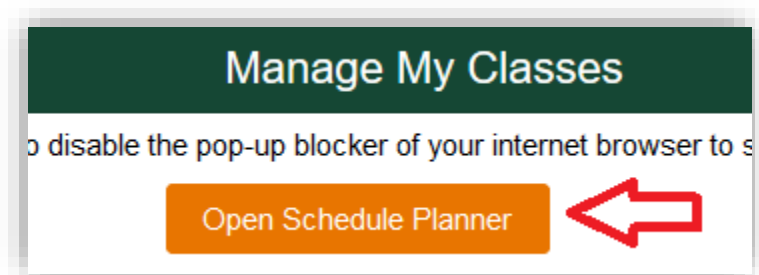

In your UTD Student Center, select the 'Manage My Classes' Tile.

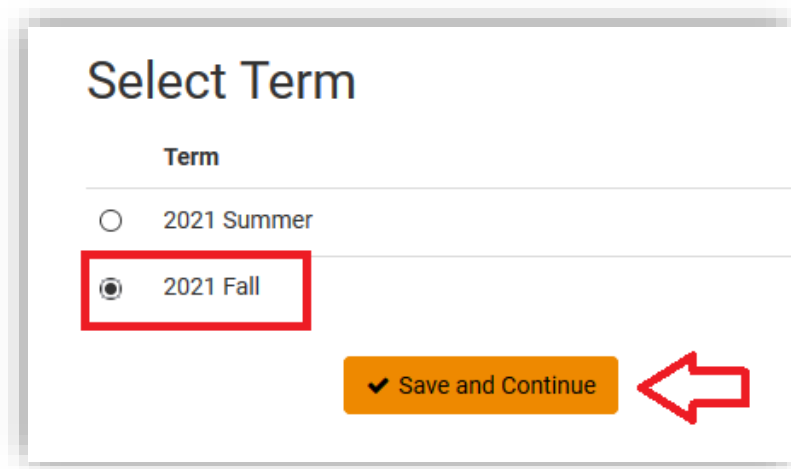

- Select 'Schedule Planner'.

Click the Open Schedule Planner Button

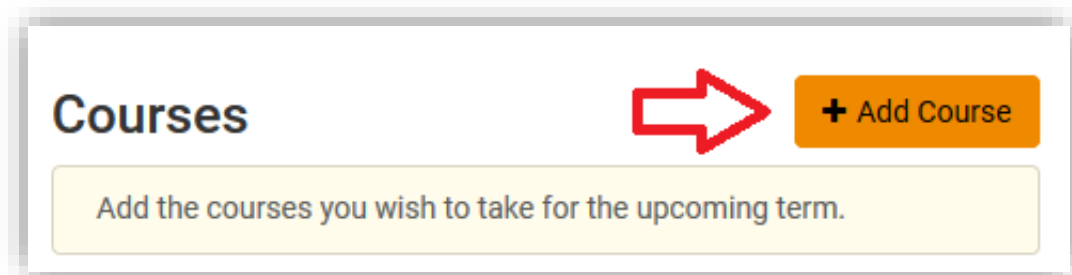

Schedule Planner will open in a new browser window.  
You may need to allow pop-ups on your internet browser.  
Select the term for which you want to register and click save and continue.

At the top of the page, you can change the default settings for Course Status, Locations, Academic Careers, Term, Sessions and Instruction Modes.

Click 'Add Course' to select the classes you want to take for the upcoming term. You may have some courses already listed based on what your schools advising office requested to have preloaded as potential classes.

Search courses by subject and course number. Click 'Add Course' to add to the list of classes. For corequisite courses that are section specific, add each class to your list of courses.
